Academy of Journalism and Communication

Major: Department of Multimedia Communication

Core Skills

- **Research & Analysis:** Business Analysis, UX Research, Customer Journey Mapping, Information Architecture
- **Design & Prototyping:** Wireframing (Low/High-Fi), Prototyping, Interaction Design, Visual Design, Figma, Adobe.

Work Experience

1. CHTlab technology research and development joint stock company — 2024 - 2026

Position: UI/UX Designer

- **EVSAFE – Smart Electric Vehicle Charging Network System:**

Designed the end-to-end mobile user experience for an EV charging station system serving both electric cars and motorbikes. Developed real-time station-finder maps, reservation flows, charging progress tracking, energy consumption measurement, and multi-method payment interfaces. Implemented as a Zalo Mini App to enable drivers to scan and charge quickly at stations without downloading a native app. Serving 5,000+ daily charging sessions.

- **Nott - Healthcare & Medical Device Platform**

Researched and designed a comprehensive healthcare ecosystem connecting real-time health-tracking medical devices. Integrated emergency alert mechanisms and direct doctor consultation channels with partner hospitals. Successfully launched and serving 500+ active daily users.

- **PLUGILO – AI-Powered Social Commerce & Search Network**

Designed a social network platform integrated with an AI-powered smart product search and comparison tool. Optimized the discovery workflow and empowered user purchasing decisions, helping the application achieve over 50,000+ downloads on the App Store.

- **VINAEX – AI-Integrated Digital Wallet & Global Financial Market Platform**

Spearheaded UI/UX design and product strategy for VinaEx, an intelligent digital wallet ecosystem integrated with AI for global financial market analysis. Built real-time dashboard interfaces, technical charts, and multi-asset trading flows across cryptocurrencies, global stocks, and international commodities. Integrated a personalized AI assistant, volatility alert system, and secure wallet management to deliver an optimal experience for both novice and professional investors.

- **PADTON – Next-Gen Blockchain & Digital Banking Platform:**

Managed UI/UX design and R&D for digital asset exchange and trading solutions integrated with Blockchain technology. Built Web3 asset management interfaces optimized for user experience and developed a Telegram Mini App for fast, seamless trading interactions.

2. REDDOT Technology Company — 2023- 2024

Position: UI / UX Designer

- **FOUNDATION – Digital Currency & Crypto Asset Management Platform**

Handled business analysis and UI/UX design for Foundation, a digital currency trading and crypto asset management platform. Built secure financial workflows, protected digital wallet interfaces, real-time market data charts, and optimized transaction flows to deliver a smooth, reliable investor experience.

- **INSOLUTION – Digital Insurance Sales & Policy Management Platform**

Handled business analysis and UI/UX design for InSolution, an end-to-end digital insurance platform. Simplified complex insurance purchasing flows, automated quote calculations and policy issuance. Built online claims management portals and automated renewal reminders, providing a transparent, fast, and optimized insurance-buying experience for customers.

3. Nexrise Solution Technology Company — 2022- 2023

Position: UI / UX Designer

- **ECOMDEX – Crypto-Enabled E-Commerce Marketplace**

Contributed as a Junior UI/UX Designer to Ecomdex, an e-commerce platform integrating digital currency and cryptocurrency payment gateways. Designed intuitive product discovery workflows, optimized checkout flows supporting crypto transactions, and built secure wallet connection interfaces to bridge traditional online shopping with decentralized finance.

- **CLICKSALE – Multi-Subject E-Learning & Course Sales Platform for Teachers & Students**

Contributed as a Junior UI/UX Designer to Clicksale, an all-in-one educational platform offering multi-subject course packages and learning management tools for teachers and students. Designed clean course catalog interfaces, optimized course registration/purchasing flows, built student progress tracking dashboards, and created efficient classroom management tools for educators.

4. Avitex Technology Company — 2021- 2022

Position: UI / UX Designer

- Researched and designed UI/UX for web and mobile applications based on company and client requirements.
- Created Design Systems, built visual design prototypes, designed icons, and developed scalable UI component solutions.
- Gathered user data via analytics reports, task analysis, and participatory design techniques, leveraging insights to drive iterative improvements and increase user satisfaction.
